## LANGUAGES

- English
- Serbian

## FEATURES

- Adaptive
- Persistence
- Team and individual work
- Problem solving mindset
- Diligent

## PROJECTS

### Information system for the clinic

By combining the skills of programming languages PHP, HTML, Bootstrap library, jQuery and MySQL successfully created and implemented an Information System for the clinic. The system is also connected to the POS terminal using a socket, thus enabling payment via credit cards.

## EDUCATION

### College of Electrical Engineering and Computing

Information systems, basic studies, 2021-2024

### Electrical engineering school "Nikola Tesla" Belgrade

Computer electrical technician, 2017-2021

## EXPERIENCES

### ECDL exam

Passed ECDL exam for work in Microsoft Word and Excel programs.

### Completed an internship

Completed internship at Payten d.o.o. Belgrade, in the period from 08.07.2024 - 02.08.2024, with a focus on POS terminals and payment applications.

### Databases

Familiar with working with databases, as well as with their implementation. Knowledge of SQL queries in MySQL and Microsoft SQL Server Management Studio.

### Networking

Subnetting of networks and networking of computers using variable subnet mask techniques.

### Web Design, Front-end, and Back-end Development

Familiar with programming languages needed to create web pages such as HTML, CSS, Bootstrap, PHP, Laravel, JS, React, as well as back end programming languages such as C, C++ and software testing using JUnit and Selenium in Java.

## SUMMARY

With versatile knowledge in programming, I conduct research and implement solutions as a full-stack developer. My passion for creating robust and scalable systems results in applications that leave a lasting impression on their users. I am ready to learn from colleagues, acquire new knowledge and be helpful in the realization of numerous projects.
